

Adrien Robert

Senior Front-End Engineer with full-stack capability

Senior front-end engineer with 12+ years building product interfaces across greentech, logistics, and edtech. Deep expertise in React, TypeScript, and multiple back-end stacks — with a growing practice in AI-augmented tooling and MCP integrations. I work best at the intersection of engineering rigour and product craft: fast enough to prototype, careful enough to scale.

📍 Berlin

EXPERIENCE

- Sep. 2024 - Present** | 1 year & 10 months | ● **Senior Front-End Developer** | React, Python | Senvo
Designed complex reporting interfaces for a B2B logistics invoice auditing platform and shipped MCP server integrations, putting Senvo's data directly inside AI agents for operations teams.
- Aug. 2020 - May 2023** | 3 years & 3 months | ● **Front-End Developer** | React, Node | Querfeld
Led front-end development for a sustainable food-rescue platform serving hundreds of Berlin businesses, owning the React/Node stack from design handoff to production.
- Apr. 2018 - May 2020** | 2 years & 1 month | ● **Full-stack Developer** | React, PHP | Skoove
Developed and maintained cross-platform piano learning features used by millions of learners on iOS and Web, working across a React + PHP full-stack.
- Feb. 2017 - Feb. 2018** | 1 year | ● **Full-stack Developer** | React, Ruby | Taledo
Built the candidate-facing front-end for a Berlin digital recruiting platform, delivering React features on a Ruby back-end in a fast-moving startup environment.
- Oct. 2016 - Dec. 2016** | 2 months | ● **Front-End Developer** | Vue | Places by Ansamb
Contributed to the front-end of a privacy-first communication app, delivering Vue components under tight shipping constraints.
- Apr. 2015 - May 2016** | 1 year & 1 month | ● **Full-stack Developer** | React, PHP | Igotcha Media
Developed React + PHP interactive digital signage solutions deployed across client networks in Canada.
- Sep. 2013 - Nov. 2014** | 1 year & 2 months | ● **ICT Technician** | PHP, Angular | Reuniwatt
Built Angular interfaces for a solar forecasting and climate monitoring system, working across the full stack in an R&D environment.

EDUCATION

- 2015 - 2016** | ● **University of Montréal, Canada** | **Certificate**, Computer Science
- 2013 - 2014** | ● **IUT de Terre-Sainte, Réunion** | **Professional Degree**, Networks and telecommunications
- 2011 - 2013** | ● **IUT de Terre-Sainte, Réunion** | **2-year Technical Degree**, Networks and telecommunications

SKILLS

- Front-End** | ● React · Next.js · TypeScript · Vue · Angular · Tailwind · Vite · Webpack · SASS · Electron
- Back-End** | ● Node.js · PHP · Ruby · Python · Postgres · MongoDB · GraphQL · REST API · Sanity · Vercel
- AI & Tooling** | ● MCP · LLM integration · Claude API · Local LLM · Cursor · RAG pipelines
- DevOps** | ● AWS (EC2 · S3 · RDS) · Docker · CircleCI · GitLab CI · Firebase · Datadog
- Testing** | ● Cypress · Selenium · Puppeteer · Vitest
- Misc** | ● Google Analytics · Mixpanel · Intercom · Linux · Raspberry Pi · Arduino
